**We provide unparalleled service,
quality, and quick turnaround for the
Instrumentation and Electrical sectors.**

Why CFI?

At CFI, we are proud to provide the energy industry with the highest level of professional service and installation.

We are committed to:

- Quick turnaround, without sacrificing quality and safety
- Transparent and continuous communication throughout a project
- Expert technical knowledge
- Commitment to a safe work environment

Benefits to You

- 24/7 on call service
- Full service facility for repairs of all instrumentation and electrical products
- Programming services
- Inventory of larger items, including, but not limited to: control valves, ESD valves, VFD motors, electric motors, MCC's, pumps, chemical tanks

How We Do Things

Project Completion in 6 Steps

1. Meet Client & Scope Project
2. Review Client Needs & Prepare Quote
3. Perform Work
4. Order Materials
5. Install & Complete Project
6. Commission & Create QC Package

Our Expert Technicians Receive 4 Years of Hands-On Apprenticeship Training

About Us

At CFI Energy Services we pride ourselves on the quality of our work, speed of delivery, and fair prices.

We are an established Oilfield Instrumentation and Electrical company with an expansive range of services from construction to a comprehensive preventative maintenance program. We are locally owned and operated in Drayton Valley, Alberta, and we believe in supporting the community through local hiring and charitable support to various organizations.

Our dedication to great service and fast delivery is what sets us apart. We are proud of the reputation we have built over the years for completing high quality jobs faster than any other company in Drayton Valley.

Project completion on time: 100%

"For the last few years CFI has been utilized as an E&I contractor in the Drayton Valley area on projects of various sizes with great success. They have provided a consistent quality product for our client in a safe and timely manner. CFI has always been very responsive to our needs, as demanding as we've been, providing an excellent service and a valuable resource in our field development."

Chris Smith, P. Eng
Acero Engineering Inc.

"We receive professional service and competitive pricing every time we use CFI Energy Services."

Hugh Cherwonka
*Instrumentation/Electrical Coordinator
Bellatrix Exploration Ltd.*

Reporting

Our reporting services provide comprehensive data that can be used in preventative maintenance and troubleshooting issues. Our skilled technicians are well trained to properly gather data and provide accurate results.

- Facility Preventative Maintenance
- Wellsite Shutdown Checks
- Meter Calibration
- Electronic Flo-meter Calculation Verification
- Fire & Gas

“Over the last few years we have carried out many projects with CFI Energy Services Corporation. They have exceeded our expectations for our electrical and instrumentation work we have carried out on the construction and maintenance side of our business. It is very evident that dependability, consistency, and cost structure are the focus of creating value for their clients as well as themselves.”

Gerald Aleman, Manager Production
New Star Energy Ltd.

Workplace Health & Safety

The management at CFI is committed to providing a safe working environment for our employees, management, sub-contractors, and our customers, as well as protecting the world around us. Our goal is to set a safety standard for our industry.

All employees, sub-contractors, management and owners are responsible and accountable for a safe work environment with proper procedures, rules, use/care/maintenance of all required:

- PPE
- Hazard identification and training to ensure that work is performed at or above industry standards, ensuring their own safety and that of their co-workers, the public and the environment
- To ensure that all are prepared to fulfill those responsibilities; government rules, regulations and company policies and procedures, as well as be a part of initial orientation and continuous review

Environmental Policy

The management at CFI believes that environmental protection is a responsibility we all share, and will strive to maintain a safe and healthy environment far into the future.

Our commitment:

Protecting the environment from harmful and destructive practices is an integral part of our safety management system and will be attained by following the policy below:

- Compliance with all applicable governing environmental laws, regulations and standards
- Provide and maintain a safe, healthy and environmentally sound workplace by utilizing proper procedures, training and equipment
- Public health and environmental damage are always at the front of company awareness throughout all activity. We ensure proper disposal of any and all chemical waste in a manner which meets or exceeds regulatory criteria

Inventory of Large Equipment
